VIVAX. Simply quality.

VIVAX is a global brand that has existed since 2004. and is currently present in more than 35 markets. As an expert in the consumer electronics category, VIVAX has the widest range of electronic devices on the market — more than 300 quality products, divided into five main categories: air conditioners, television and audio devices, white goods and built-in white goods, small household appliances and smart devices. All electronic devices are produced according to the real needs of consumers, with proven technology and according to the latest EU standards, without deviations in quality.

One of the greatest advantages of the VIVAX brand is the excellent after-sales service supported by a branched service network in all markets.

Small household appliances

VIVAX small household appliances are characterized by ease of use, attractive and modern design, affordable prices and high quality, to make everyday life easier and better.

HOUSEHOLD

Vacuum cleaners

0° LYING POSITION

The ergonomics that enable a 0° lying position, easy separation into a smaller handheld vacuum cleaner and an additional extension for narrow openings and brushes for various uses ensure that every corner of the home can be reached effortlessly.

0°

MULTI FILTRATION SYSTEM

VIVAX vacuum cleaner removes up to 95% of all unwanted particles in the home using cyclone purification technology with an efficient multi-filtration system.

HEPA FILTER

The HEPA filter in the vacuum cleaner prevents bacteria and allergens from returning back into the room.

CYCLONIC FILTRATION TECHNOLOGY

A cyclonic vacuum cleaner, pulls the dirt and dust at high speed through a filter and into a collection vessel. A small air vortex is made inside the bin by the motor, which separates the particles from the air and pushes them to the sides of the bin. Afterwards, gravity takes care of the rest and particles fall to the bottom.
