This device has the ability to operate as a freezer but can also function at temperatures similar to a regular refrigerator. Its efficiency is maintained even when a larger quantity of food is stored, and the "Super Cool" and "Super Freeze" functions speed up the cooling process.

Due to its vertical position, this freezer takes up little space, and the usable volume of 238 L is enough to store all the necessary food items, even for larger families, throughout the year.

This refrigerator has digital control with LED indicators and a quick freeze function.
